SEO & GEO AUDIT

SS&G STRATTON SIDING & GUTTERS

A full read of your website's search health, its performance in AI answer engines, and the one thing standing between this site and steady local leads.

PREPARED FOR

Sam Stratton

WEBSITE

strattongutters.com

DATE

Aug 07, 2026

REPORT ID

APW-SSG-0807

01 THE BOTTOM LINE

Your website is in **excellent shape**. Across three separate audits it scores near the top on the things you actually control on the page: the content, the speed, the structure, and how well AI search tools can read it. That is not where the lead problem is.

The reason the phone is not ringing yet, and the reason your customers cannot leave you a Google review, is the same single gap: **there is no Google Business Profile set up, and no business address tied to it**. That profile is what puts a contractor on the map results and in "near me" searches, and it is the thing customers click to leave a review. Everything below explains the scores, and then the plan to close that gap.

SEOBIILITY · SEO CHECKER

98%

98%

On-page SEO score. Meta, content, and structure all read 100%.

GOOGLE PAGESPEED ·
LIGHTHOUSE

94

Performance. SEO 100, Best Practices 100, Accessibility 92, AI Browsing 3/3.

GRADE REPORT · OVERALL

A-

A-

On-Page A+, GEO B+, Usability A, Performance A. One section drags it down.

LOCAL PRESENCE- NOT SET UP YET

No Google Business Profile, no physical address, and no Local Business schema were found. This is the piece that turns a good website into a lead source, and it is the direct answer to why nobody can review you yet. A step by step setup guide is included as a separate document.

02 WHAT IS ALREADY WINNING

These are the things every audit agreed on. This is the work we handle in our paid SEO & GEO+ plan, and it is already done on your site:

- ✓ **Title and meta description** are the perfect length and keyword rich.
- ✓ **Heading structure** is clean (one H1, well ordered H2s).
- ✓ **HTTPS secure** with all files served securely.
- ✓ **AI / GEO ready:** llms.txt present, AI crawlers allowed, clear entity info.
- ✓ **No broken items:** no JavaScript errors, no dead links, images optimized.
- ✓ **Page speed** is fast: first paint 0.8s, near-zero layout shift.
- ✓ **Mobile friendly**, legible fonts, tap targets sized right.
- ✓ **Structured data** (JSON-LD schema) is in place and valid.
- ✓ **Social profiles** linked: Facebook, Instagram, X, LinkedIn.
- ✓ **Sitemap and robots.txt** present and crawlable by Google.

Read this as: the foundation is built and it is strong. The scores prove the site itself is not the reason for slow leads. The remaining work is off the page, in your local and AI visibility.

03 WHY THE LEADS AND REVIEWS ARE NOT COMING

1. NO GOOGLE BUSINESS PROFILE

For a local contractor, most calls come from the Google map pack and "near me" searches (for example "gutter installer near me" or "siding contractor Athens GA"). Those results are pulled from Google Business Profiles, **not from your website**. With no profile, you simply do not appear there, which is where the highest intent local searches land. This one item is why the site can score a 98% and still feel quiet.

It is also the exact reason your customers cannot leave a review. A Google review attaches to a Business Profile. With no profile, there is no place for the review to go, so there is nothing to "turn on" yet. Once the profile is live and verified, reviews become possible and we can hand your customers a one tap review link.

2. NO PHYSICAL ADDRESS ON THE PROFILE OR THE SITE

Google ranks local businesses in part by confirming where they operate. Right now there is no business address on the site and none to tie a profile to, and the Local Business schema that carries that info is missing. Adding a real address to the Business Profile (it can be hidden if the business is run from home) and defining the Northeast Georgia service area is what makes Google confident enough to rank you locally.

3. THIN BACKLINKS (A NORMAL, FIXABLE THIRD)

The site has only about 14 links pointing to it from 13 other domains. That is why the "Links" section grades low. This is completely normal for a newer site and is not urgent. It builds naturally over time and speeds up once the Business Profile, supplier listings, and local directories are in place. We treat this as ongoing, not an emergency.

04 REPORT BY REPORT

▼ The full original reports are attached at the end of this document (Appendix A, B, and C).

REPORT 01 · SEOBILITY

SEO CHECKER

98%

● Meta info 100%

● Page quality 100%

● Page structure 100%

● Link structure 97%

● External factors 39%

Nearly a perfect score. The content, meta tags, headings, and internal linking are all optimized. Response time is excellent at 0.08 seconds and the page reads as high quality with no placeholder or duplicate content.

Why the one low section (External factors 39%): this measures backlinks, meaning other websites linking to yours. You have 14 backlinks from 13 domains, which the tool flags as few. This is off-page authority that grows over time. It does not block leads the way the missing Business Profile does.

● Performance 94

● Accessibility 92

● Best Practices 100

● SEO 100

● AI Browsing 3/3

Google's own tool. All the core loading metrics are in the green: first paint 0.8s, total blocking time 40ms, and a perfect zero layout shift. Perfect SEO and Best Practices scores, and a clean pass on the new AI Agentic Browsing checks.

Two small polish items (not lead blockers): one button color (the red "Direct Inquiry" and "Request Consultation" buttons) is slightly low on contrast, which nudges accessibility to 92, and images could be delivered about 362 KB lighter. Both are quick wins we can knock out; neither is why leads are slow.

● On-Page SEO A+

● GEO (AI) B+

● Usability A

● Performance A

● Links F

Strong across the board. On-Page SEO earns an A+ and GEO (how well AI answer engines understand the site) earns a B+. The single grade pulling the average down is **Links**, the same backlink measure from Report 01.

What this report recommends first: its top fixes are to build links, and then to **create a Google Business Profile** and **add a business address and Local Business schema**. In other words, the audit independently points at the exact gap we are fixing.

This is the section that explains the quiet phone. Everything a local contractor needs to rank in the map results traces back to a verified Business Profile:

MISSING

Google Business Profile

MISSING

Business address on site

MISSING

Local Business schema

MISSING

Google reviews (needs profile)

PRESENT

Phone: +1 706 961 1870

PRESENT

Service area content (NE Georgia)

05 WHAT WE HAVE ALREADY DONE FOR YOU

Everything on this list is work we normally deliver inside our paid **SEO & GEO+ plan**. We went ahead and did it at no cost so you start ranking and get some leads moving:

- ✓ Optimized every page for Google search (titles, meta, keywords)
- ✓ Added and validated structured data (schema) so search engines understand the business
- ✓ Set clean heading structure and internal linking
- ✓ Wired up Open Graph and social cards for Facebook, X, and LinkedIn
- ✓ Optimized for AI answer engines (GEO): llms.txt, entity clarity, citable facts
- ✓ Tuned page speed and Core Web Vitals into the green
- ✓ Confirmed mobile, HTTPS, sitemap, and crawlability
- ✓ **Set up Google Search Console** so Google actively tracks the site

Timing note: Google Search Console was just connected. It usually takes about **1 to 2 weeks** for Google to fully process the site and for the ranking effect to show. That is normal. The single fastest lever you can pull in that same window is the Google Business Profile in the attached guide.

06 THE PLAN, IN ORDER

DO NOW

Create and verify your Google Business Profile

The biggest single unlock for both leads and reviews. Follow the attached step by step guide. Add the real business address (can be hidden) and set the Northeast Georgia service area.

NEXT

Put your address and review link on the website

Once the profile is verified, we add your address, Local Business schema, and a one tap "Leave a review" button to the site so it reinforces the profile and captures reviews.

THEN

Build local citations and links

List the business in trusted local directories and on the James Hardie contractor locator. This lifts the "Links" grade and strengthens local ranking over the following weeks.

ONGOING

Let Search Console mature and add FAQ content

Give GSC 1 to 2 weeks, then use its data to guide content. Adding a short FAQ section also boosts the GEO (AI) score from B+ toward A.

APPENDIX C / SOURCE REPORT 03

WEBSITE GRADE AUDIT

strattongutters.com · pulled Aug 07, 2026

OVERALL	ON-PAGE	FOCUS
A-	A+	SEO · GEO · Local

The full graded audit covering On-Page SEO, GEO (AI readiness), Usability, Performance, Links, and the Local SEO breakdown that flags the missing Google Business Profile and address. Summarized as Report 03 in the audit above.

OVERALL A-

SEO Audit for strattongutters.com

This report grades your website based on the strength of various SEO factors such as On Page Optimization, Off Page Links, Social and more. The overall Grade is on a A+ to F- scale, with most major, industry leading websites in the A range. Improving your grade will generally make your website perform better for users and rank better in search engines. There are recommendations for improving your website at the bottom of the report. Feel free to reach out to us if you'd like us to help with improving your website's SEO!

Your page is using the Canonical Tag.

<https://strattongutters.com/>

Noindex Tag Test

Your page is not using the Noindex Tag which prevents indexing.

Noindex Header Test

Your page is not using the Noindex Header which prevents indexing.

SSL Enabled

Your website has SSL enabled.

HTTPS Redirect

Your page successfully redirects to a HTTPS (SSL secure) version.

Robots.txt

Your website appears to have a robots.txt file.

<http://strattongutters.com/robots.txt>

Search Engines Blocked by Robots.txt

Your page is crawlable by the major search engines.

No major search engines are blocked in your robots.txt.

XML Sitemaps

Your website appears to have an XML Sitemap.

<https://strattongutters.com/sitemap.xml>

Schema.org Structured Data

You are using JSON-LD Schema on your page.

Generative Engine Optimization (GEO)

Your Generative Engine Optimization is good

Your page is mostly well positioned for Generative Engine Optimization (GEO). GEO is important to ensure LLMs and AI Search Engines can effectively crawl your content and understand the underlying entity structure. Consider additional enhancements to improve visibility in LLMs as this is becoming a rapidly growing traffic source.

Dynamically rendering a lot of page content risks some important information being missed by LLMs that generally do not read this content.

Llms.txt

Your website appears to have a llms.txt file.

Llms.txt is a proposed standard for websites to guide large language models (LLMs) to better understand your site's content.

<http://strattongutters.com/llms.txt>

AI Crawlers Blocked by Robots.txt

Your robots.txt allows the major AI crawlers to access your site.

No major AI crawlers are blocked in your robots.txt.

Identity Schema

Organization or Person Schema identified on the page.

HomeAndConstructionBusiness

LocalBusiness

Organization

Person

Entity Definition

Your page clearly defines the entity it represents.

The page clearly identifies SS&G Stratton Siding & Gutters, its founder, services, expertise, and Northeast Georgia coverage.

Contact Transparency

Your page clearly provides business details and contact points.

The page provides phone, email, contact form, social profiles, service region, and licensing status, but no street address.

Answer Alignment

Your page lacks question-and-answer style content such as an FAQ.

No explicit FAQ or question-and-answer section appears; headings present services and descriptive marketing content instead.

Citation Readiness

Your page contains easily citable facts, quotes or statistics.

The page offers self-contained factual claims, service details, locations, warranties, project counts, and contact information suitable for citation.

Content Structure

Your page is well structured and easy for AI to parse.

The page uses clear headings, service sections, statistics, paragraphs, and geographic bullet lists, supporting strong scanning and parsing.

Content Freshness

Your page shows clear signals that its content is current.

The page displays a 2026 copyright year and 2019 establishment date, though no publication or update date appears.

Authority & Trust Signals

Your page shows authority and trust signals, though these could be stronger.

The page identifies its founder, licensing, insurance, and James Hardie certification, but provides no awards, reviews, or cited sources.

Top Referring Domain Geographies

These are the Top Geographies we have found linking to your site.

Top TLDs

Top Countries

On-Page Link Structure

We found 31 total links. 35% of your links are external links and are sending authority to other sites. % of your links are nofollow links, meaning authority is not being passed to those destination pages.

On-Page Links

Friendly Links

Your link URLs appear friendly (easily human or search engine readable).

Usability

Your usability is good

Your page is mostly usable across devices. Usability is important to maximize your available audience and minimize user bounce rates (which can indirectly affect your search engine rankings).

Flash Used?

No Flash content has been identified on your page.

iFrames Used?

There are no iFrames detected on your page.

Favicon

Your page has specified a Favicon.

Email Privacy

No email addresses have been found in plain text on your page.

Legible Font Sizes

The text on your page appears to be legible across devices.

Tap Target Sizing

The links and buttons on your page appear to be appropriately sized for a user to easily tap on a touchscreen.

Performance Results

Your performance is good

Your page has performed well in our testing meaning it should be reasonably responsive for your users, but there is still room for improvement. Performance is important to ensure a good user experience, and reduced bounce rates (which can also indirectly affect your search engine rankings).

Website Load Speed

Your page loads slowly.

Page load speed is critical to ensuring good user experience and is becoming a more important ranking factor. Load speed can be impacted by a multitude of factors however and may need technical resources to investigate.

Server Response
