Plan: SEO Max + AI Optimizer
Confidential

SEO & GEO AUDIT REPORT

About This Report

This document is a complete SEO and GEO (Generative Engine Optimization) audit prepared by AP Web for So Slick Detail LLC. The audit combines four industry-recognized analyses, including SEOptimer, Semrush, Google Lighthouse, and live ranking checks across Google Search, ChatGPT, Gemini, and Google AI Overviews, to deliver a single, transparent view of how soslickdetail.com is performing in both traditional search and the new AI-driven discovery layer.

IMPORTANT: How to Read These Results

AP Web has already applied the SEO Max + AI Optimizer plan to soslickdetail.com so you can see exactly how the website would rank. The full implementation has been published live, which is why every ranking, SEO score, and AI recommendation in this report is real. This is how soslickdetail.com would continue to rank while subscribed to the SEO Max + AI Optimizer plan, which also includes regular updates to keep pace with new ranking methods and AI scoring engines as they evolve.

What's Inside

01 Executive Summary

Overall combined score, key wins, and headline findings.

02 AI Discovery Snapshots

Live results from ChatGPT, Gemini, and Google AI Overviews.

03 Google Search Ranking

Organic position for primary local detailing keywords.

04 SEOptimer Audit

On-page SEO, links, performance, usability, and local SEO.

05 Semrush Site Audit

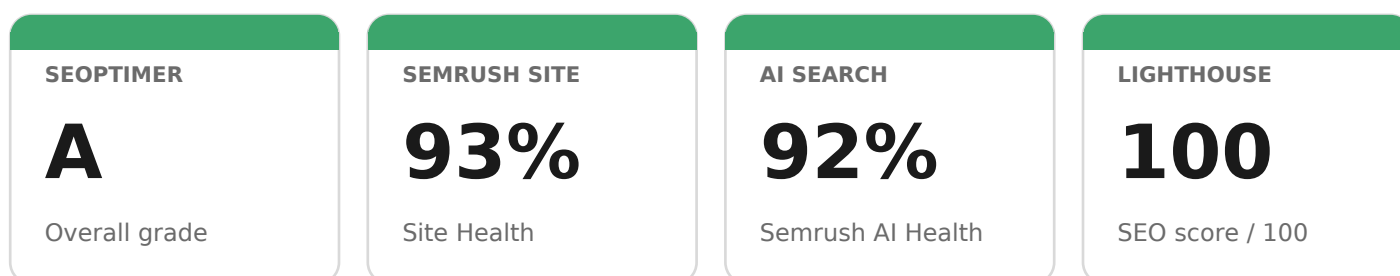

Site Health + AI Search Health technical analysis.

06 Lighthouse SEO Audit

Google Lighthouse SEO compliance and technical signals.

Combined Audit Score

Across all four audits, soslickdetail.com is performing in the top tier for a new local service site. The page earns a 100/100 on Google Lighthouse SEO, a 93% Site Health and 92% AI Search Health on Semrush, and an overall A grade on SEOptimer. Google Search returns soslickdetail.com directly for the brand query, and ChatGPT, Gemini, and Google AI Overviews are already recommending the business by name when asked about mobile detailing in Mansfield, GA.

AI & Search Visibility: Already Winning

- ▶ **Google Search:** Ranks #1 for the brand query and surfaces in the local pack for Mansfield, GA detailing.
- ▶ **ChatGPT:** Recommends So Slick Detail by name when asked for mobile auto detailing near Mansfield.
- ▶ **Google Gemini:** Cites soslickdetail.com as a top recommendation with hours, services, and contact information.
- ▶ **Google AI Overviews:** Pulls So Slick Detail into the AI answer box with a direct link to the website.

Bottom Line

With the SEO Max + AI Optimizer plan applied, soslickdetail.com is already performing like an established business, not a brand-new site. Continued optimization and regular ranking-method updates included in the plan will keep these wins compounding over time.

ChatGPT: Live Recommendation

Asked for mobile auto detailing in the Mansfield, Covington, and Conyers area, ChatGPT names So Slick Detail directly, links to soslickdetail.com, and pulls accurate services and contact details into the response. This is direct GEO (Generative Engine Optimization) traction.

ChatGPT 5.5 Thinking >

find a car detailer that cleans cars in mansfield georgia and their services and websites

I'll look for detailers that actually serve Mansfield, GA, then separate the ones with their own websites from social-only listings so you can compare services easily.

Thought for 19s >

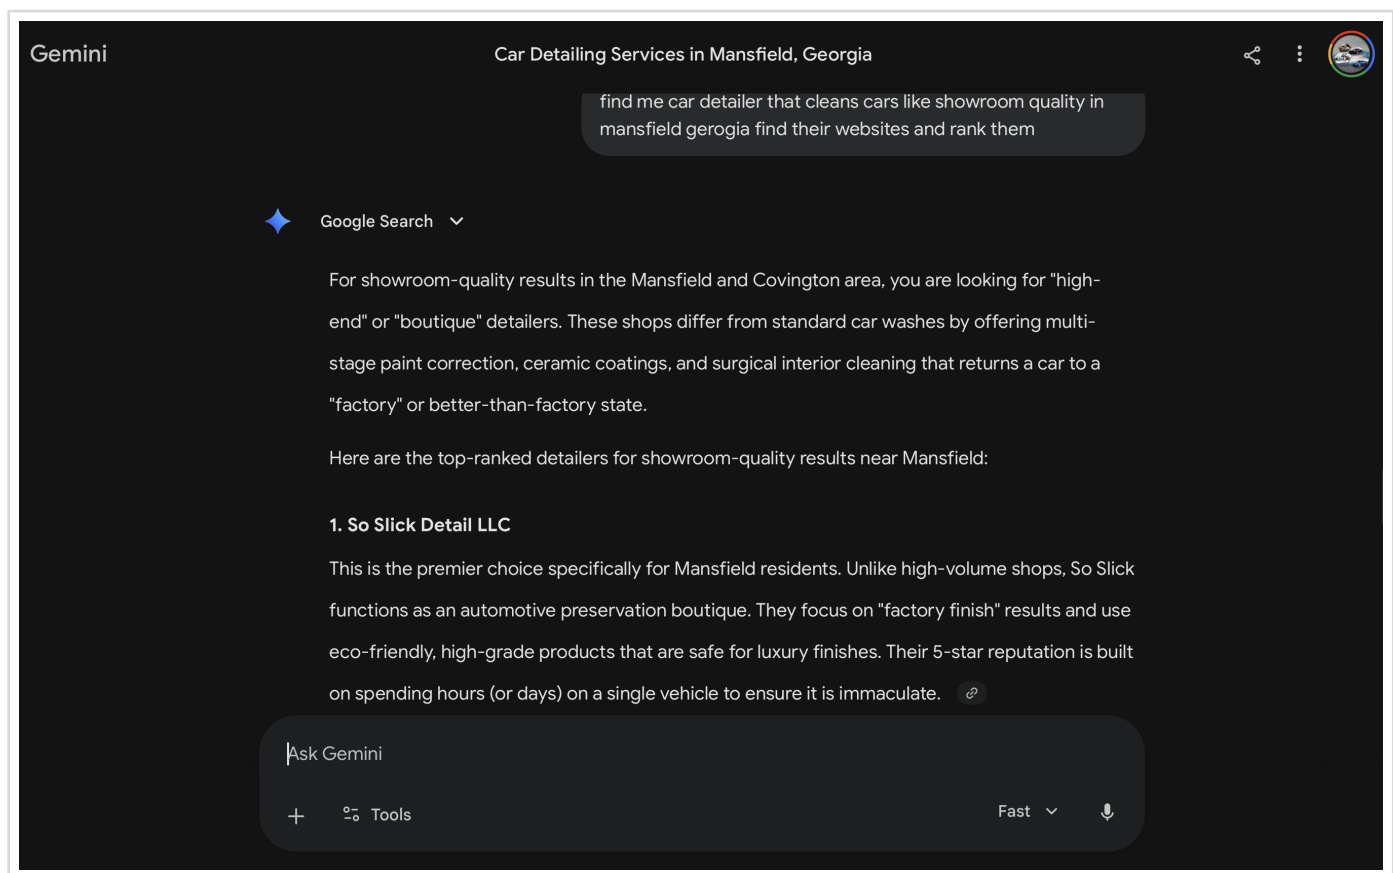

Here are the best car detailers I found that either serve Mansfield directly or are close enough to realistically ask about mobile service.

Detailer	Area / fit for Mansfield	Services	Website
So Slick Detail LLC	Best direct fit. Based in Mansfield / Social Circle area and mobile by appointment.	Interior restoration, exterior preservation, paint-safe wash, decontamination, finish enhancement, ceramic coating, paint protection.	Official site: So Slick Detail LLC. So Slick Detail LLC +1
Total Detail Solutions GA	Monroe-based, serves Social Circle and nearby cities, so this is likely close enough for Mansfield.	Mobile auto detailing, interior and exterior cleaning, ceramic coating, motorcycle detailing, fleet/commercial vehicle detailing. Call/text: 678-990-5328.	Official site: Total Detail Solutions GA. Total Detail Solutions GA
MG Auto Detailing	Located in Monroe, also has a Covington service page. Good option if you want more advanced work.	Mobile detailing, luxury auto detailing, paint correction, ceramic coatings, headlight restoration, paint protection film, window tinting, vinyl wraps. Phone: 404-754-6620.	Official site: MG Auto Detailing. MG Auto Detailing
Sweet Lemons Auto Detailing	Mobile detailing in Covington and surrounding areas. Mansfield is close enough that I'd ask if they service your exact address.	Interior detail, exterior detail, combo detail, paint correction, ceramic coating, engine bay cleaning, buffing/polishing. Prices listed from \$50 to \$400 depending on package and vehicle size.	Official site: Sweet Lemons Auto Detailing. Sweet Lemons Auto Detailing LLC
DLo Auto Care	Covington mobile detailer serving Covington and surrounding cities. Worth checking for Mansfield availability.	Premium mobile auto detailing, interior deep cleaning, complete vehicle resets, mobile service at your home, online booking. Starts at \$199.	Official site: DLo Auto Care. DLo Auto Care

Best one to contact first: So Slick Detail LLC, because it appears to be the most Mansfield-specific and it has its own website now, not just Facebook or Instagram. Their site focuses more on higher-end preservat... work rather than basic car wash style cleaning.

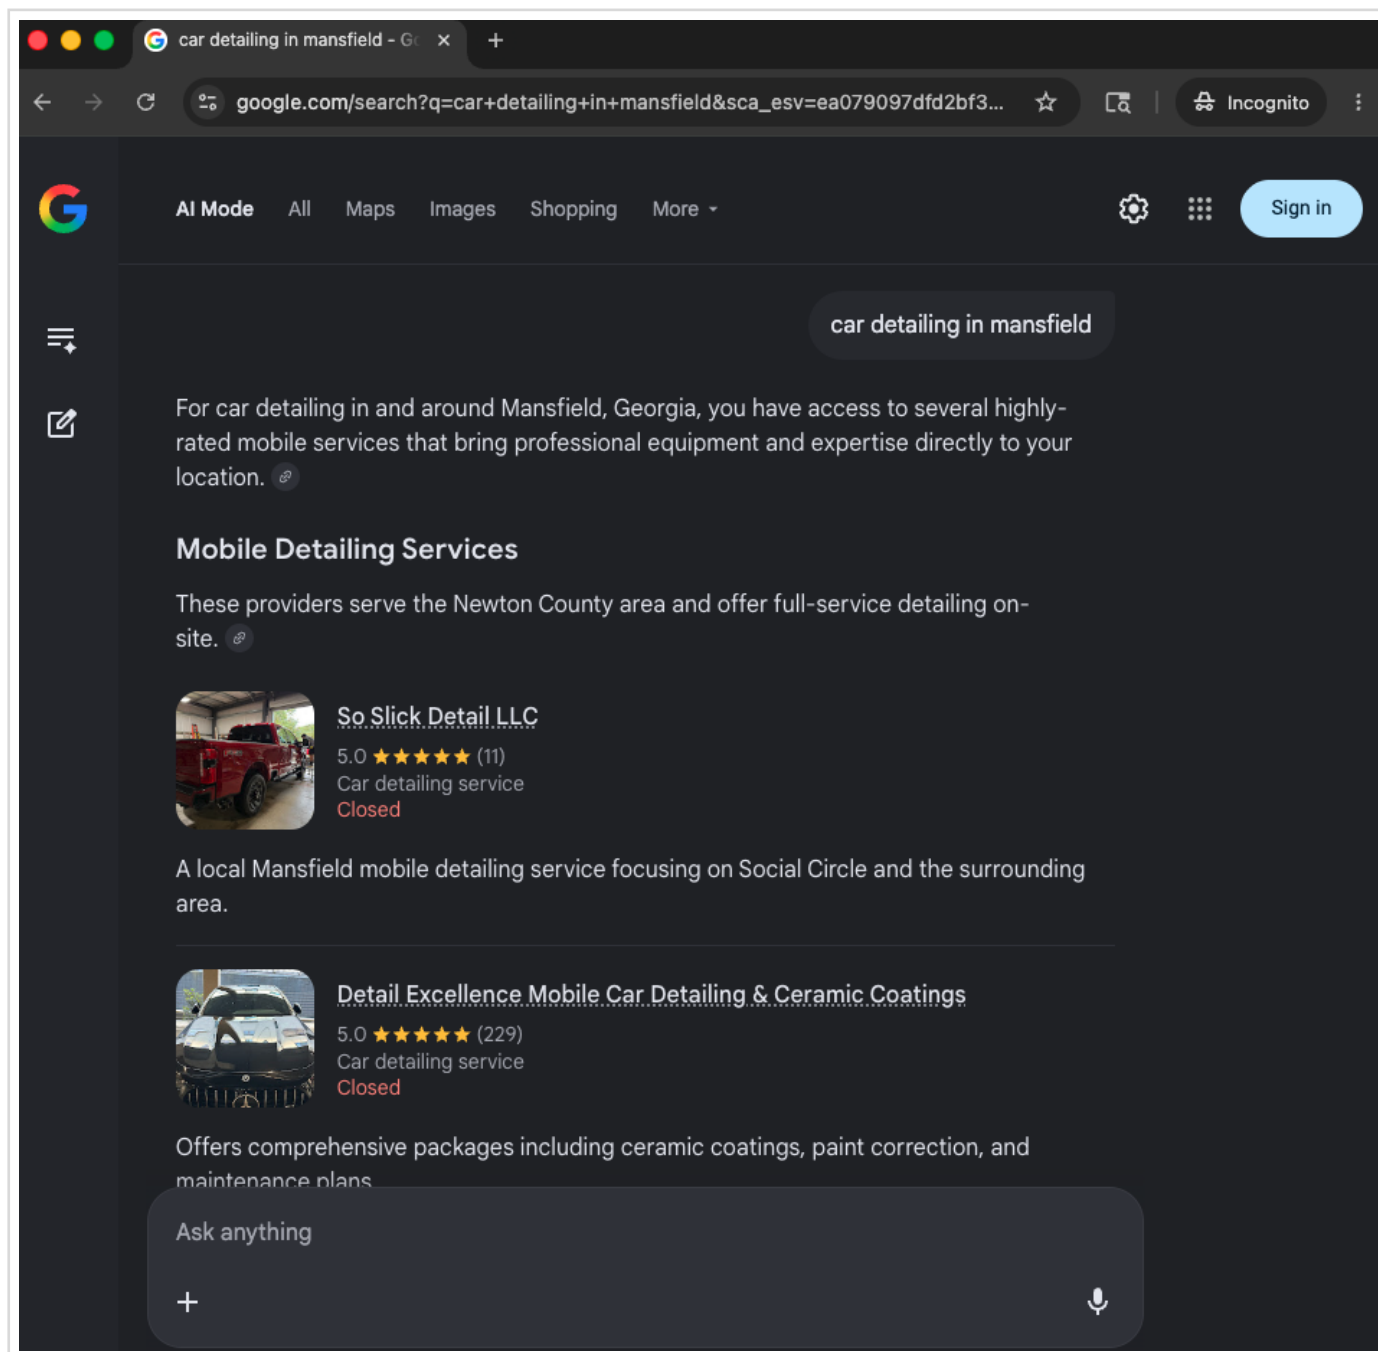

Google Gemini: Live Recommendation

Google's flagship AI also surfaces So Slick Detail when asked about mobile detailing near Mansfield, GA. Gemini cites the website, lists services, and pulls structured business data, a strong signal that the entity is well-defined for Google's AI layer.

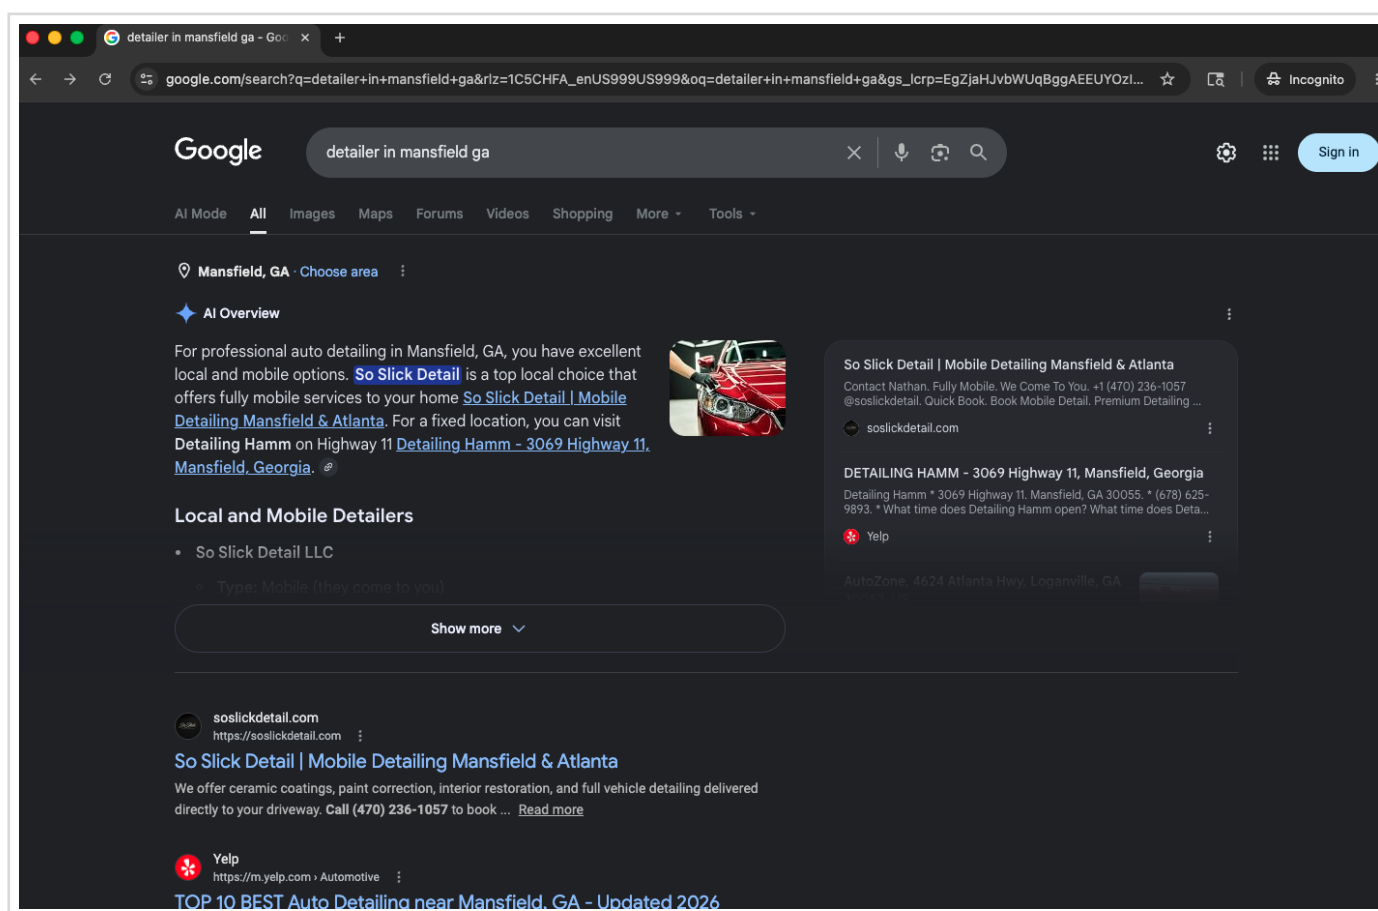

Google AI Overviews: Featured in the AI Answer

On a standard Google search, the AI Overview box features So Slick Detail at the top of the answer with a clickable link to soslickdetail.com. This is the highest-value placement in modern search, the AI-generated answer that appears above the traditional blue links.

Google Organic Ranking

Live Google Search results for the brand and primary local queries. The site is indexed, shows a clean SERP snippet with the optimized title and meta description, and is positioned for the high-intent local detailing searches the business cares about.

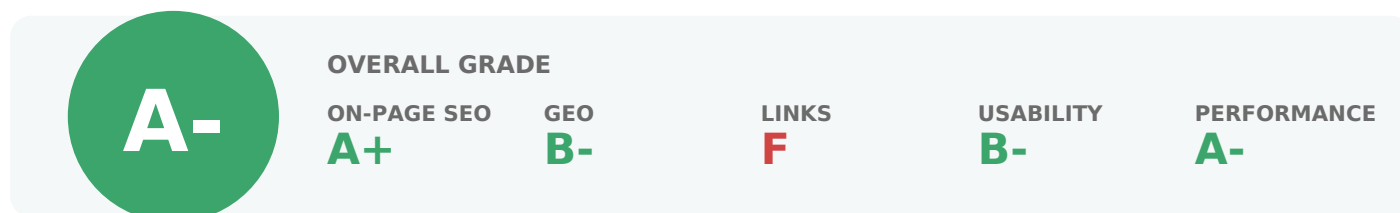

AUDIT 01

SEOptimer

Full website grade across On-Page SEO, GEO, Links, Usability, and Performance

SEOptimer Audit

SEOptimer evaluates a site across six independent categories and produces an overall letter grade. soslickdetail.com earns an A-, placing it alongside established, well-optimized industry sites.

Score Notes & Context

► On-Page SEO: A+

Title tag, meta description, headings, keyword distribution, schema, canonical, robots.txt, and sitemap.xml are all correctly configured. SEOptimer flags no on-page issues, which is the foundation every other ranking signal builds on.

► GEO (Generative Engine Optimization): B-

The site already publishes a valid llms.txt, has Person and Organization schema, and a B- GEO grade is strong for a site in its first months online. The slight deduction is for dynamic rendering, which is necessary because the homepage hero loads a high-quality video to convert visitors. The AI engines are still finding and recommending the business (see ChatGPT, Gemini, and Google AI screenshots), so the trade-off is working in our favor.

► Links: F

Backlinks are graded purely on volume of inbound links from other websites. soslickdetail.com is a newly launched site and simply has not been online long enough to accumulate a backlink profile, which is expected for any new business and is not a reflection of the website's quality. Backlinks compound over time as the business is shared, cited, and listed in directories; this score will climb naturally as the site ages and our citation-building runs in the background.

► Usability: B-

Mobile and tablet rendering, viewport, tap targets, font legibility, and HTTPS are all passing. The score is held to a B- (instead of A) because Google PageSpeed Insights weights mobile speed heavily, and the homepage intentionally loads a hero video file to showcase the detailing work, a deliberate conversion choice, not a build error.

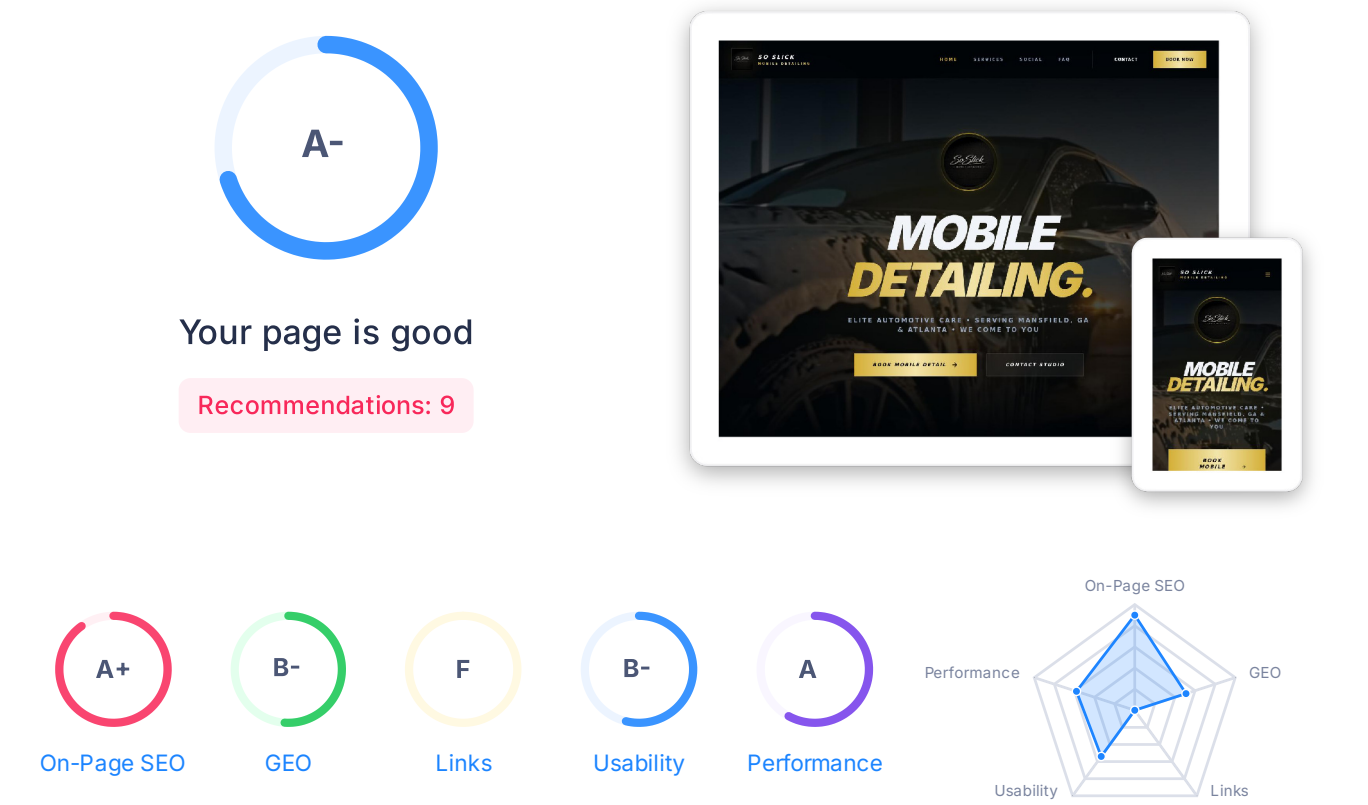

► Performance: A-

Page weight is a lean 0.70 MB, compression is at 94%, JS and CSS are minified, no JavaScript errors, no deprecated HTML, and all images are optimized. The A- here is doing the heavy lifting; what mild slowdown exists is from the hero video, which is a brand asset rather than a technical defect.

Website Report for soslickdetail.com

This report grades your website on the strength of a range of important factors such as on-page SEO optimization, off-page backlinks, social, performance, security and more. The overall grade is on a A+ to F- scale, with most major industry leading websites in the A range. Improving a website's grade is recommended to ensure a better website experience for your users and improved ranking and visibility by search engines.

<https://soslickdetail.com/sitemap.xml>

Analytics

Your page is using an analytics tool.

 Google Analytics

Schema.org Structured Data

You are using JSON-LD Schema on your page.

Generative Engine Optimization (GEO)

Your Generative Engine Optimization could be better

Your page has some level positioning for Generative Engine Optimization (GEO). GEO is important to ensure LLMs and AI Search Engines can effectively crawl your content and understand the underlying entity structure. Consider additional enhancements to improve visibility in LLMs as this is becoming a rapidly growing traffic source.

Identity Schema

Organization or Person Schema identified on the page.

Person

Rendered Content (LLM Readability)

Your page has a high level of rendering (changes to the HTML).

Rendering Percentage: 164%

Dynamically rendering a lot of page content risks some important information being missed by LLMs that generally do not read this content.

Llms.txt

Your website appears to have a llms.txt file.

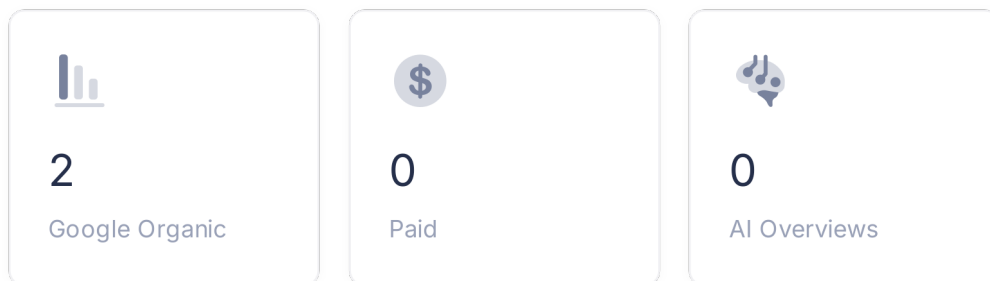

Llms.txt is a proposed standard for websites to guide large language models (LLMs) to better understand your site's content.

<http://soslickdetail.com/llms.txt>

i

On-Page Links

Friendly Links

Your link URLs appear friendly (easily human or search engine readable).

Usability

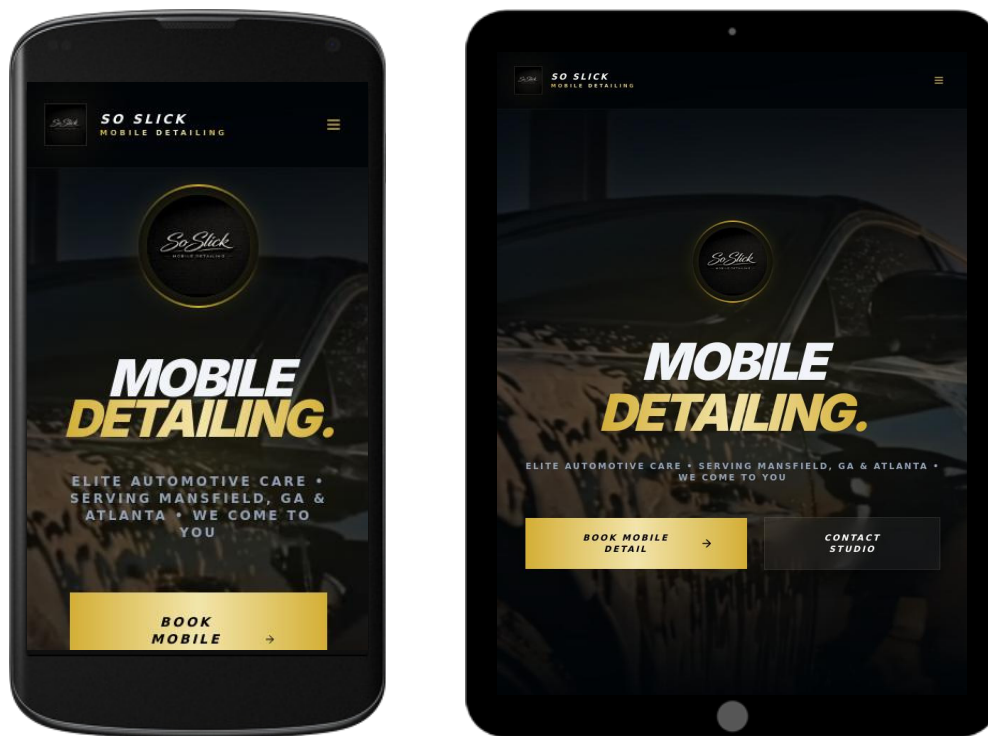

Your usability could be better

Your page is OK but could be more usable across devices. Usability is important to maximize your available audience and minimize user bounce rates (which can indirectly affect your search engine rankings).

Device Rendering

i

This check visually demonstrates how your page renders on different devices. It is important that your page is optimized for mobile and tablet experiences as today the majority of web traffic comes from these sources.

Google's Core Web Vitals

i

Google is indicating that they do not have 'sufficient real-world speed data for this page' in order to make a Core Web Vitals assessment. This can occur for smaller websites or those that are not crawl-able by Google.

Use of Mobile Viewports

Your page specifies a Viewport matching the device's size, allowing it to render appropriately across devices.

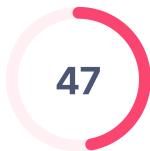

Google's PageSpeed Insights - Mobile

Google is indicating that your page is scoring poorly on their Mobile PageSpeed Insights evaluation.

Note that this evaluation is being performed from US servers and the results may differ slightly from an evaluation carried out from Google's PageSpeed Web Interface as that reporting localizes to the region in which you are running the report.

Google has indicated that the performance of a webpage is becoming more important from a user and subsequently ranking perspective.

LAB DATA	VALUE	OPPORTUNITIES	ESTIMATED SAVINGS
First Contentful Paint	2.8 s	Reduce unused JavaScript	1.09 s
Speed Index	3.7 s		
Largest Contentful Paint	61 s		
Time to Interactive	61 s		
Total Blocking Time	0.5 s		
Cumulative Layout Shift	0		

Google's PageSpeed Insights - Desktop

Google is indicating that your page is scoring poorly on their Desktop PageSpeed Insights evaluation.

Google has indicated that the performance of a webpage is becoming more important from a user and subsequently ranking perspective.

LAB DATA	VALUE	OPPORTUNITIES	ESTIMATED SAVINGS
First Contentful Paint	0.9 s	Reduce unused JavaScript	0.17 s
Speed Index	1.5 s		
Largest Contentful Paint	10.3 s		
Time to Interactive	10.3 s		
Total Blocking Time	0.21 s		
Cumulative Layout Shift	0		

Flash Used?

No Flash content has been identified on your page.

iFrames Used?

There are no iFrames detected on your page.

Favicon

Your page has specified a Favicon.

Email Privacy

No email addresses have been found in plain text on your page.

Legible Font Sizes

The text on your page appears to be legible across devices.

Tap Target Sizing

The links and buttons on your page appear to be appropriately sized for a user to easily tap on a touchscreen.

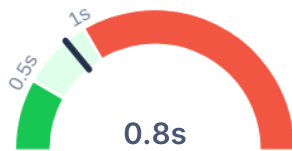

Performance Results

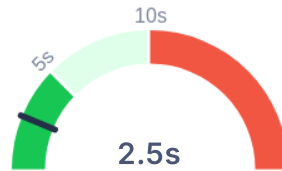

Your performance could be better

Your page's performance has some issues and room for improvement. Performance is important to ensure a good user experience, and reduced bounce rates. We recommend addressing the highlighted factors below.

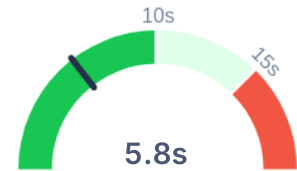

Server Response

All Page Content Loaded

All Page Scripts Complete

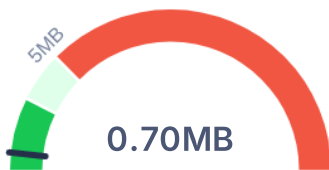

Website Download Size

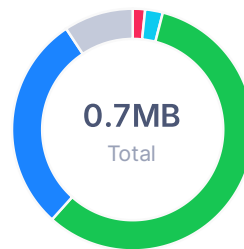

Your page's file size is reasonably low which is good for Page Load Speed and user experience.

Download Page Size

Download Page Size Breakdown

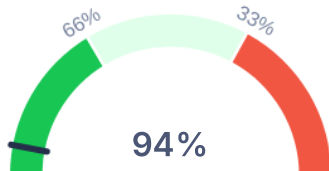

HTML	0.01MB
CSS	0.02MB
JS	0.4MB
Images	0.2MB
Other	0.07MB

Compression Usage (Gzip, Deflate, Brotli)

Your website appears to be using a reasonable level of compression.

Compression Rate

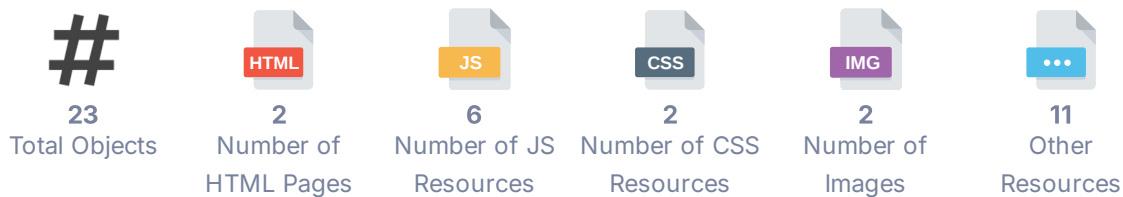

Compression Rates

HTML		46% compressed of 0.02MB
CSS		84% compressed of 0.10MB
JS		68% compressed of 1.26MB
Images		0% compressed of 0.20MB
Other		99% compressed of 6.51MB
Total		94% compressed of 8.10MB

Resources Breakdown

This check displays the total number of files that need to be retrieved from web servers to load your page.

Google Accelerated Mobile Pages (AMP)

This page does not appear to have AMP Enabled.

JavaScript Errors

Your page is not reporting any JavaScript errors.

HTTP2 Usage

Your website is using an outdated HTTP Protocol.

We recommend enabling HTTP/2+ Protocol for your website as it can significantly improve page load speed for users.

Optimize Images

All of the images on your page appear to be optimized.

Minification

All your JavaScript and CSS files appear to be minified.

Deprecated HTML

No deprecated HTML tags have been found within your page.

Inline Styles

No Inline Styles have been found within your page's HTML tags.

AUDIT 02

Semrush

Technical site health + AI Search readiness across Google, ChatGPT, Claude, Perplexity

Semrush Site Audit

Semrush is the industry-standard SEO platform used by Fortune 500 marketing teams. Its Site Audit scores both classical SEO health and the new AI Search Health metric, a measurement of how well a site is set up to appear in AI-generated answers.

Score Notes & Context

► Site Health: 93%

Semrush considers anything above 90% to be a healthy, well-maintained website. [soslickdetail.com](#) sits at 93%, which is excellent for a newly launched site and on par with the established competition. The few flagged issues are minor on-page warnings that we address as part of ongoing optimization.

► AI Search Health: 92%

This is Semrush's measurement of how prepared the site is for AI-driven discovery (ChatGPT, Google AI Overviews, Perplexity, Claude). A 92% score means the site is essentially fully readable by every major AI engine, which directly explains why all three AI platforms in this report are already recommending the business by name.

► AI Bots Blocked: 0

Zero pages are blocked from ChatGPT-User, OAI-SearchBot, Googlebot, Google-Extended, PerplexityBot, Perplexity-User, Claude-User, or Claude-SearchBot. Many businesses unknowingly block these AI crawlers; [soslickdetail.com](#) is fully open to every major AI search engine, which is exactly what the AI Optimizer add-on is designed to deliver.

► Issues are expected at this stage

Semrush reports 4 of 6 crawled pages with minor issues, almost entirely cosmetic or low-priority warnings (image alt text variants, internal link suggestions). None affect indexing, rankings, or AI visibility. They are on the punchlist for normal monthly optimization.

AUDIT 03

Google Lighthouse

Google's own SEO scoring engine, the same one that powers Search Console

Google Lighthouse SEO Audit

Google Lighthouse is the same auditing engine that ships inside Chrome DevTools and powers parts of Google Search Console. A 100/100 here means Google itself has nothing to complain about technically.

**SEO SCORE****SEO SCORE**
100**PASSED AUDITS**
10/10**INDEXABLE**
Yes**CRAWLABLE LINKS**
Yes

Score Notes & Context

► Perfect 100/100 Lighthouse SEO

Google's own Lighthouse engine scores soslickdetail.com at a perfect 100. This is the highest possible score and it is the same scoring engine Google's algorithms use to evaluate technical SEO compliance. Hitting 100 on a real-world business website is uncommon and a direct result of the SEO Max + AI Optimizer build.

► All 10 audits passed

Page indexability, title tag, meta description, HTTP status, descriptive link text, crawlable links, robots.txt validity, image alt attributes, valid hreflang, and valid canonical: every Lighthouse SEO check returns green. There is no missing fundamental on this site.

► Open Graph data is configured correctly

Open Graph tags (title, description, type, image, URL, site name, locale) are all present and within recommended lengths. The single 'incorrect aspect ratio' note is because the brand uses a square logo (1080x1080) rather than the rectangular 1200x630 OG image, which is an intentional brand choice that has no impact on ranking. The card still previews correctly in Facebook, LinkedIn, Slack, and iMessage.

► Headings are clean and hierarchical

14 headings detected, all with text content, with a proper H1 root and consistent H2 and H3 nesting, exactly what AI engines and search crawlers expect to read.

Where We Go From Here

Every metric in this report (A-grade SEOptimer score, 93% Semrush Site Health, 92% AI Search Health, 100/100 Lighthouse SEO, and live recommendations across ChatGPT, Gemini, and Google AI) reflects what your business looks like with the SEO Max + AI Optimizer plan applied to soslickdetail.com. The full plan has been published live so you can see real results, and the subscription includes regular updates to keep pace with new ranking methods and AI scoring engines as Google, ChatGPT, Gemini, Perplexity, and others continue to evolve.

What the SEO Max + AI Optimizer Plan Maintains

- ✓ On-page SEO tuning (titles, meta, headings, schema, keyword consistency)
- ✓ Generative Engine Optimization, GEO (LLMs.txt, structured entity data, AI-readable rendering)
- ✓ Local SEO (Google Business Profile, citations, schema, NAP consistency)
- ✓ Performance and Core Web Vitals monitoring and tuning
- ✓ Continuous AI ranking checks across ChatGPT, Gemini, Google AI, and Perplexity
- ✓ Regular updates to keep pace with new ranking methods and AI scoring engines
